FOR IMMEDIATE RELEASE:

## **TRU-VU MONITORS, INC. ANNOUNCES RELEASE OF NEW MM-17B MEDICAL-GRADE HD COLOR FLAT-PANEL LCD DISPLAY**

*Arlington Heights, Illinois (February 4, 2010)* - TRU-Vu Monitors, Inc. has released a new Medical-Grade 17" LCD monitor that is an ideal replacement for outdated CRT displays. It has greatly improved image quality (1.3 megapixel resolution, 720p HD) and is less than half the size and weight of a CRT.

Now doctors and surgeons can have superb image quality in a compact and lightweight design. The [MM-17B](#) can be wall or boom-mounted via standard VESA mounts.

The [MM-17B](#) has excellent brightness, contrast, and viewing angle, and offers extremely fast response time (5 msec), eliminating image lag. Video inputs include VGA and Composite; S-Video is also available.

Being truly Medical-Grade (conforming to UL60601-1), the MM-17B is easy to clean and to keep germ-free. The 12 VDC input voltage offers maximum safety (a medical-grade 110/220 VAC external power supply is also included).

The [MM-17B](#) is the perfect cost-effective standard-resolution and HD solution for operating rooms, clinics, hospitals, and GI, endoscopy, urology and other medical OEM systems.

[19"](#) and [22"](#) models are also available, as well as other video input types (DVI, HDMI).
