

NEWS RELEASE

FOR IMMEDIATE RELEASE:

NEW 21.5" SUNLIGHT READABLE MONITOR OVERPOWERS THE SUN

Arlington Heights, Illinois (April 25, 2012) - Finally, a LCD monitor that can actually be viewed in direct, bright sunlight. Unlike standard monitors, laptops and cell phones which appear washed-out or nearly invisible outdoors, the new [SRM-21.5R](#) Sunlight Readable monitor produces sharp, crystal-clear HD video images that are bright enough to overpower sunlight, or other harsh ambient light.

The [SRM-21.5R](#) Sunlight Readable monitor has the performance to satisfy even the most demanding users. It features full HD (1920 x 1080) resolution; super-wide 178° x 178° viewing angle; Anti-Reflective coating; lockable OSD controls; and VGA, HDMI, DisplayPort and DVI video input signals. And they are backed by a full 3-Year Warranty.

Similar [10.4", 15", 17" and 19" Sunlight Readable monitors](#) from **TRU-Vu** are already being successfully used in a wide range of applications, including industrial, military, law enforcement, aviation, marine, transportation, public safety, amusement parks, kiosks, digital signage, message boards, menu boards, and more.

The [SRM-21.5R](#) Sunlight Readable displays can be custom-modified to meet your specific needs. They can also be private-labeled with your company name, logo and model number. To see all detailed specifications, please click [HERE](#).
