

PRESS RELEASE

New 19" LCD Monitors With 4:3 Aspect Ratio Get A Refresh

(Arlington Heights, Illinois) - **TRU-Vu** Monitors, a leading supplier of industrial-grade monitors and touch screens, has released new models in their popular line of 19" LCD video monitors with traditional 4:3 aspect ratio.

The newest model is the [VMM-19U](#) which adds digital HDMI video input capability to the range of standard inputs (analog Composite BNC, VGA, S-Video and DVI). It also features 1280x1024 resolution, 350 nits brightness, defect-free LCD panels (no dead or bright pixels), **TRU-Tuff** treatment for maximum shock and vibration resistance, rear VESA mount holes and a full 3-year warranty.

As many other monitor manufacturers abandon 4:3 aspect ratio models, TRU-Vu has ramped up their development. "There are still thousands of products and systems on the market that require 4:3 aspect ratio video monitors," said Herb Ruterschmidt, President of TRU-Vu Monitors, Inc. "This new model is in direct response to customer demand, and adds to our growing list of monitors. As more and more manufacturers abandon 4:3 aspect ratio models, our sales continue to grow."

The VMM-19 Series monitors are available in a wide range of configurations including steel and water-proof enclosures, panel-mount enclosures, 1,000 nits brightness, touch screens and more.

For more information on how the [VMM-19U](#) or any of our other models can fulfill your 4:3 monitor needs, please contact us at:
