

PRESS RELEASE

FOR IMMEDIATE RELEASE

New 15" Sunlight Readable Waterproof Touch Screens

(Arlington Heights, Illinois) - **TRU-Vu Monitors**, a leading supplier of industrial-grade monitors and touch screens, has released a new 15" Sunlight Readable touch screen monitor with a waterproof stainless steel panel-mount enclosure.

The new [SRMHTRWP-15V](#) features a 15" screen with over 1,500 nits of brightness. (This is over 5X brighter than a standard desktop monitor). This makes it ideal for use in direct sunlight or other high ambient-light conditions.

The 5-wire resistive touch screen can be activated by a bare or gloved finger, pen, stylus or nearly any other object. It is highly resistant to dirt, dust or moisture on the screen.

The waterproof stainless steel panel-mount enclosure enables this model to be flush-mounted into a wall, cabinet, control panel or on a ship. The NEMA 4X water-resistant front face withstands splashing or spraying water. The [SRMHTRWP-15V](#) is ideal for use in industrial, manufacturing, food processing, marine, automation control, military and other applications. It can also be modified or customized to meet your exact requirements.
