13" SUNLIGHT READABLE DISPLAYS

The SRMH-13.3U are 13.3" 1500 nit monitors. They feature at least 1500 nits brightness and a 16:9 aspect ratio. We design the SRMH-13.3 Series monitors for use in direct sunlight. Consequently, they are also perfect for other high ambient-light conditions. They utilize state-of-the-art LED backlights. The models in this series produce at least 1,500 nits brightness. In contrast, this is over 3 to 5 times brighter than standard monitors. For example, standard monitors are only 200-300 nits brightness. Therefore, the result is amazingly bright screen. This will provide you with crystal-clear images, even with bright, direct sunlight on the face of the screen.
