15" HIGH BRIGHTNESS LCD

The SRMHOB-15U-36 are 15" high brightness LCD with the addition of Optical Bonding. They feature at least 1500 nits brightness and a 4:3 aspect ratio. We design the SRMHOB-15U-36 15" for use in direct sunlight. Consequently, they are also perfect for other high ambient-light conditions. They utilize state-of-the-art LED backlights. The models in this series produce at least 1,500 nits brightness. In contrast, this is over 3 to 5 times brighter than standard monitors. For example, standard monitors are only 200-300 nits brightness. The result is an amazingly bright screen. This will provide you with crystal-clear images, even with bright, direct sunlight on the face of the screen.

OPTICALLY BONDED DISPLAY

The SRMHOB-15U-36 15" high brightness LCD feature Anti-Reflective glass to protect the LCD panel. The glass also reduces unwanted surface reflections. However, the glass also introduces internal reflections. Therefore, TRU-Vu daylight readable monitors include **Optical Bonding**. This process injects an optical-grade resin into the air gap between the LCD panel and the glass. This completely fills the gap. The Optical Bonding eliminates the internal reflections. It also increases the contrast ratio, thereby greatly improving image quality. Optical Bonding also eliminates moisture and condensation beneath the glass.

RUGGED INDUSTRIAL MONITORS

These 15" 1500 nit displays are extremely rugged. For instance, we build them with true industrial-grade components. Furthermore, they receive our exclusive TRU-Tuff treatment. The TRU-Tuff process includes RTV silicone on all connections

and critical components. Additionally, all wires are dressed, tie-wrapped and secured. Lastly, we apply ThreadLock to all screws. The rugged ABS enclosure ensures maximum shock and vibration resistance for this rugged 1500 nit monitor.

EXTREME OPERATING TEMPERATURE DISPLAYS

We design the SRMHOB-15B-36 15" High Brightness Display Series to operate in nearly any environmental conditions. Whether in frigid conditions or blazing heat, these sunlight displays will survive and thrive. To clarify, these monitors will operate in temperatures down to 32°F (0°C). They will also withstand brutal heat. Moreover, operating temperatures go up to 149°F (65°C). The rugged painted steel enclosure assures these 15" high brightness displays will provide years of reliable imaging performance. Specifically, typical MTBF for these monitors is 50,000 hours.

OUR EXPERTS WILL HELP YOU FIND THE BEST 15" MONITOR FOR YOUR APPLICATION

Our 15" high brightness LCD 1500 nit monitors have been deployed in a wide range of demanding industries. For example, military, law enforcement, aviation and entertainment benefit.
