# NEWS RELEASE

FOR IMMEDIATE RELEASE:

12.1" Super-Bright Sunlight Readable Monitor

Arlington Heights, Illinois - **TRU-Vu** Monitors, a leading supplier of industrial-grade LCD monitors, announces the latest addition to their line of Sunlight Readable monitors.

The new SRMHX-12 Series Sunlight Readable TFT LCD monitors feature 1024 x 768 XGA resolution and a 4:3 aspect ratio. The high-efficiency, long-life LED backlights produce over 1,500 nits (cd/m²) of brightness; this will enable users to see clear, brilliant color images even in intense, bright sunlight. This makes them ideal for industrial, marine, military, oil and gas, law enforcement, auto racing, aviation, inspection, advertising, aerospace, transportation and factory automation applications.

The SRMHX-12 Series Sunlight Readable monitors also feature lockable On-Screen Display controls, Dim-to-Black function for night-time use, internal speakers and 12VDC or 90-240 VAC operation.

SRMHX-12 Series are extremely rugged; they are designed to industrial-grade standards, and backed by a full 3-year warranty. They feature our exclusive **TRU-Tuff** treatment to ensure maximum shock and vibration resistance. Operating temperature range is -22° to +185°F (-30° to +85°C).

These monitors are also available with Optical Bonding, touch screens, and panel mount or waterproof configurations.
