FOR IMMEDIATE RELEASE:

24" Video Displays & Touch Screens for Surgical Operating Rooms

(Arlington Heights, IL) - **TRU-Vu** Monitors, a leading supplier of Medical-Grade LCD displays, has launched a new line of 24" HD surgical LCD monitors and touch screens.

The new [MM-24 Series](#) monitors were designed to provide surgeons and medical staff with vivid full HD-quality color video images and 178° x 178° viewing angles to enhance their ability to make critical decisions quickly and accurately.

All models feature rear VESA holes to conveniently mount to any boom arm or medical cart. A variety of digital video inputs ensures compatibility with endoscopic, laparoscopic and other cameras, and a wide range of other medical imaging systems and operating theaters.

The [MMZBTP-24 Series](#) surgical touch screens feature a Projected Capacitive-type touch screen. These provide multi-touch capability and can be activated with surgical gloves or exposed fingers. The modern zero-bezel edge-to-edge front glass design enhances visibility and simplifies cleaning.

Both the monitors and touch screens are UL 60601-1 listed and comply with current CSA and IEC 60601-1 safety regulations relating to medical applications.
